# Mward Genesii of Species

521. List of his objections.

- 25 Giraffe, with M.S. notes
- 34 On variations in all directions M.S. notes
- 37 Flat fish.
- 39 Origin of limbs. Not contra
- 40 Whalebone
- 42 Larynx of young Kangeroos (add the whale)
- 44 <sup>Pelicanina</sup> Metamorphosis of flies.
- 46 Metamorphosis of flies.
- 47 Mammary glands - & 142 to foamy
- 50 Cobra.
- 53 Roots of Corti
- 62 Objection demonstrably sufficient
- 72 The shoulder of pterodactyle.
- 75 & 77 ear & eye of cuttlefish w. M.S. notes
- 78 <sup>Anularis</sup> Placenta of mammals & sharks.
- 82 Resemblance of mouse & a marsupial.
- 85 Effects of conditions on butterflies from Wallace
- 97 Modification as great as between Hippopotamus & horse —

Mivart's Genesies

105 Abortion of finger in the Potto

107 believes wing of birds comp. suddenly developed -

107 on origin of tendons. [See p 47]

110 Macrauchenia a very generalized structure.

112 M. S. notes on suddenness of var. good -

130 Seems to believe that bat & pterodactyle suddenly developed -

139 argues rate of change in progenitors before their divergence from the amount of difference in their descendants

145 The same fishes in distant continent.

148 Pterodont lizards & certain insectivores in Madagascar -

153 } Diff. from homologies of skull bones.

158 } serial

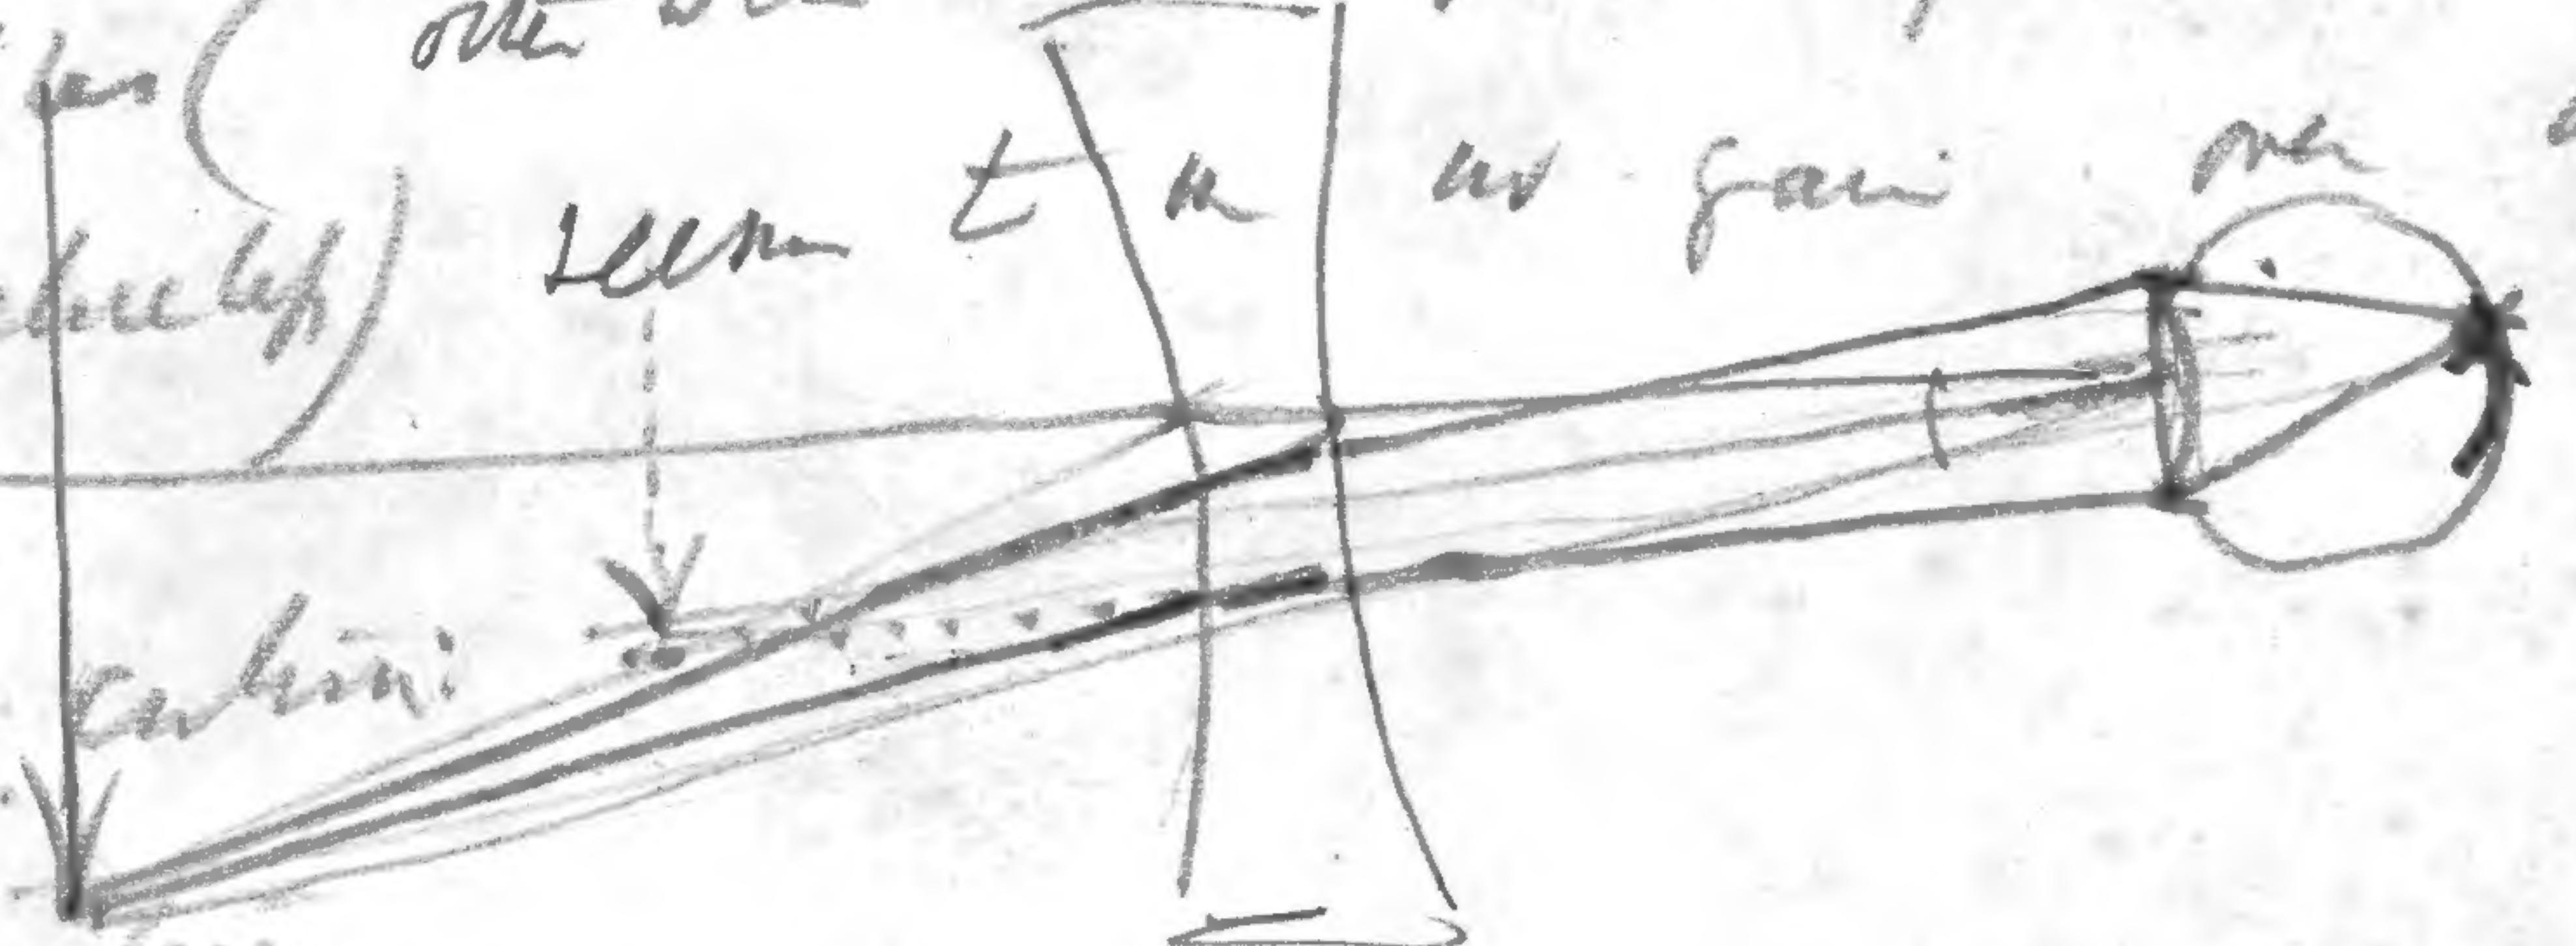

163. H. Spencer on <sup>serial</sup> cereals homologies

164 Mivart thinks there is an internal force or tendency -

170 There is serial homology in Chitons

relation with A. Ultra is denied in all important, as  
long as charges stand, for the fact can't stand  
for scientific reasons in my own belief that  
solid shapes & form & the power & I suppose - Birds  
etc & Standard pos (other wise ~~in~~ <sup>in</sup> account of wide  
and long "far & to suddenly) seem to a us gain over a

as bird of aspect certain  
of course we know  
but not so much difficult to prove
